COMPANY PROFILE

Flarebio Biotech LLC is a National High-Tech Enterprise with research, production and sales as one. Our main business includes recombinant proteins and antibodies (CusAb), ELISA Kits (CUSABIO), raw materials for diagnostic reagents (CUSAg), food safety testing products (WHISERKON). We mainly provide related products to well-known pharmaceutical R&D companies, diagnostic reagents manufacturers, government regulatory testing agencies, universities, enterprises and research institutes at home and abroad.

CUSABIO is one brand of Flarebio Biotech which is specialized in developing and producing ELISA kits, has a sound platform for the development of ELISA kit, mature antigen-antibody research and development system.

CUSABIO are proficient in a variety of ELISA technologies, such as the double-antibody sandwich method, double antigen sandwich method, (direct) competition ELISA, indirect competition ELISA, blocking method, indirect ELISA and other methods. Combined with diagnostic kits development team, we are able to develop the kits with clinical diagnostic level, and make the quality in the leading place worldwide. We can assure low intra and inter assay precisions of the ELISA kits as much as possible because we employ triple quality control procedures. The stability of each component in our kit is optimized by high temperature damage test for avoiding the antibody & antigen inactive during transportation & storage. Our kits stand out from the field of research reagents and being popular in dozens of countries worldwide with their perfect standard curves, strict quality control and high stability.

Autoimmune

Autoimmunity is the failure of an organism in recognizing its own constituent parts as self, thus leading to an immune response against its own cells and tissues. Any disease that results from such an aberrant immune response is termed an autoimmune disease. Cusabio offers a variety of tools for your autoimmune disease research.
